

# Home Learning 'menu' of activities – Week commencing 13.07.20

## Whole School

Dear Parents,

It has been lovely to see so many of our children across all year groups attending school during the last two weeks. Responding to feedback, we have adapted our approach to Home Learning during this last fortnight to support with transition to new year groups. Please do feel free to share your child's learning on Tapestry. Whilst teachers are looking forward to seeing what they have done, we won't be commenting individually on Tapestry as instead teachers are contacting parents individually (some of you will already have been contacted) and putting in many preparations for September. Please do remember to send in your child's written home learning in the last week so teachers can review this and Tapestry over the summer in order to best support your child in September.

Thank you for your on-going support.

Mr. Purkiss

### Can you make a den?

This could be outside; using branches, or if the weather is bad you could do it indoors using whatever is to hand - check with a grown-up first!

Lots of you will have enjoyed weaving in OWL Adventures. Can you **make a nature loom** when out for a walk?

### Bathwick Bake Off!

Try making pizzas, muffins or flapjacks or what about a Victoria Sponge Cake?

**Can you build a tall tower?** Use scrap materials or Lego, or how about trying marshmallows and spaghetti?

**Create a model of a famous building** – for example Big Ben, Tower of London, Clifton Suspension Bridge...or even our school!

Have a competition with a family member(s) to **create a boat**. Who can come up with the best design? Then test them on the water! Will yours sink or swim?

Design your own **dream tree house!**

What will yours look like?

**Create an obstacle course!** Then try it out with someone else – perhaps you can compete as a family! Here are a few ideas: Egg and spoon race, skipping, star jumps, throwing and catching, throwing a ball or beanbag into a box or bucket.

**Go for a walk in the woods.** What can you make using natural materials? Could you make a story map or a sculpture? Look for interesting things to use- sticks, leaves, pebbles and take a photograph of your finished piece.

**Become an author and illustrator!** Can you write and illustrate a story? You could use your computing skills and type the text. Once you have finished share the story with family and friends.

**Create a journey stick.** Go on a nature walk and collect a stick. As you go along, collect things from your journey. These may be things like leaves, twigs, flowers, feathers, or anything natural you find on the way.

**Build a marble run!**

Head out for a walk and **forage** for some elderflower. Find a recipe online to make your own cordial.

**Create a treasure hunt** for a friend or family member. This could either be in your own home or around town with clues for different places to visit!

**Create your own secret alphabet code!** Can you then write messages to someone and see if they can work out what you are saying?

**Create a passport for your new teacher.** What do you want them to know? Will you add any photographs?
